

abundance.csv

Field	Description	Data type
DataTableID	Unique numerical code for each source to match with table captrends.csv	Character
Abundance	Time-series value representing population abundance or density.	Numeric
Year	Time point of population abundance estimate (in years)	Numeric

Note: In cases where the time series was recorded as a series of population changes (e.g. lambdas), we back-converted these into a time series of abundance estimates against a reference population abundance of 100
